18 months

**Location**  
Rush Green

**Starting**  
Flexible dates

**Age**  
Adult 19+  
Apprenticeships

**Careers**  
Digital & IT

### How do apprenticeships work?

If you prefer a more practical style of learning, an apprenticeship or higher apprenticeship could be the ideal option for you. They enable you to learn on the job and gain nationally recognised qualifications at the same time. [Find out more about apprenticeships.](#)

## Overview

An IS (Information Systems) Business Analyst is an advisory role that provides a critical layer of challenge and scrutiny for organisations wishing to deliver IS change successfully.

IS Business Analysis enables organisations to 'do the thing right'.

The role involves early and regular investigation and analysis to ensure the right IS solution is chosen to meet the required business need.

The main focus of the IS Business Analyst role is to model business processes and to facilitate, coordinate and document detailed business requirements regarding the business change agenda.

IS Business Analysts will determine and present solutions for how information systems can be used to improve operational efficiency. They'll also support acceptance testing to ensure that the proposed solution meets the defined requirements.

The apprenticeship provides a route into a recognised career in leading and supporting successful change delivery in a range of organisations.

## Entry requirements

To join the programme you'll need to have A Levels, a Level 3 apprenticeship, or other relevant qualifications and experience.

## Professional registration links

This apprenticeship is recognised for entry onto the BCS Register of IT Technicians.

Complete the programme and you'll be eligible to apply for registration.
