

# CSI (Crime Scene Investigation) Experience Day

**As a trainee Crime Scene Investigator it's your role to help solve the case and bring the criminal to justice.**

## **A body has been found**

You and your team of highly skilled investigators must work together to examine the scene.

Where are the clues?

What do you notice and what's missing?

What can be used as evidence?

## **Science will help you crack the case**

You will use forensic techniques to conduct tests on the evidence gathered at the crime scene. Real-life scientific know-how will help you understand the clues and crack the case.

## **Justice is in your hands**

If you miss a piece of evidence the criminal may get away with it. You will need to concentrate hard.

### **Audience**

Young people aged 10-14

### **Duration**

1 Day

### **Cost**

£7 per person plus VAT

### **To book email**
