

Director's Cut Experience Day

For more than 100 years stop-motion animation has fascinated generations of children and adults alike.

Stop-motion animation has created those characters we all know and love, such as Wallace & Gromit, Shaun the Sheep and the Fantastic Mr Fox.

Clever thinking and smart technology

In the past, stop-motion animation was a long and slow process. Just one second of animation needed 24 different images! You needed a lot of patience and a steady hand.

Now science has come to the rescue with clever thinking and smart technical tricks.

Discover the science behind Hollywood

You will become a budding film maker as you unlock the science secrets behind film.

You will create short animated movies that can be taken home to wow your family and friends.

Audience

Young people aged 10-14

Duration

1 Day

Cost

£7 per person
