

The Titanic Experience Day

All Aboard Shipmates!

Welcome to the most famous ship ever built.

Whilst her makers declared her 'unsinkable', RMS Titanic was lost in icy seas on her maiden voyage on 12 April 1912.

Become a Marine Investigator

Join our Marine Investigation (MI) Team and explore how 100 years of science helped to create, sail and eventually discover the location of the ship wreck.

How science could have saved Titanic

You will understand how better communication could have saved the ship, and the series of events that caused her to sink.

Using Computer Aided Design software, you will recreate parts of the RMS Titanic using design skills that you will discover by taking part in this interactive activity. Could you be a designer of the future?

Audience

Young people aged 10-14

Duration

1 Day

Cost

£7 per person plus VAT
